

PETAL

User Training Manual

LLPT 1.2 – Master Data1- Trading Partner Management V1.0

CONTENTS

- **Trading Partner Management.**
- **Third Party Charges**

TRADING PARTNERS

- Trading Partners are the clients on-boarded into the PETAL network
- Trading partner can be online (who has access to application) or offline (who doesn't have access to application)
- Every trading partner in the network should select and define the business relationship with their counter trading partners for gaining mutual access on transactions created

At least primary contact is Required

- Click on trading partner record from summary page to navigate to the modify/update screen

TRADING PARTNERS

Update Trading Partners

- “General” section contains the type and relationship with the partner
- All fields with (*) are mandatory
- Trading partner numbering criteria is configured in application set up whether to follow automatic or manual. This is the unique number assigned to the trading partner in that client environment
- Payment terms information will be defaulted to the customer invoices on shipments made
- To end the business relationship with a trading partner, end date information needs to be updated on the record

CHARGE CODE	CHARGE NAME	CHARGABLE TO	VENDOR TO VISIBLE	CHARGE BASIS	ACTIVE	
88	Temperature Recorder	Vendor	 	Per Unit	 	
25	Inspectio	Vendor	 	Per Unit	 	

- Third party charges are additional overheads applied on purchase order along with item costs
- Charges can be added while creating PO and sometimes while generating billing
- All applicable charge codes in the client's business process need to be selected under charge types
- Click on 'Add Charge' will open a blank row to select charge code and other information
- When 'Show Inactive' is enabled, screen will show the inactive charge types also but by default the screen will show the active charge types for that client
- Click save after updating the charges information

Thank You
